

Based at a Western Australian tertiary institution?

JH Lord Travel Grants are available to support your attendance at local, national and international geological conferences and field excursions. Applicants presenting the results of their work will be given priority.

Grants for an interstate conference or field excursion will typically cover the registration fee, and, if applicable, subsidise an economy airfare and budget accommodation costs.

Geoconferences (WA) Inc. is a non-profit association comprises committed volunteers dedicated to the promotion of geoscience, in particular Precambrian geology, by arranging conferences, symposia and other meetings. Surplus funds are used to develop the careers of young geoscientists and promote the study and understanding of Western Australian geology by providing travel grants.
